

SI reviewer: repository and analysis of Defra EU exit statutory instruments

April 2021

Background

Greener UK is a coalition of 12 environmental NGOs working to ensure environmental standards and protections are maintained and enhanced throughout and following the Brexit process. Since 2018, Greener UK has been monitoring Defra statutory instruments (SIs) of environmental interest, and particularly those related to Brexit. Experts from across the coalition have provided analyses of these SIs, which can be found in this resource.

The reviewer can be found [here](#).

Greener UK has also published a [briefing](#) which sets out the common issues we have identified in Defra EU exit SIs since 2018.

What is this resource?

This is a list of most Defra EU exit related SIs with environmental relevance from 2018 to the current day. It includes headline analysis and links to relevant submissions, reports, briefing and parliamentary debates. It is presented as a spreadsheet.

Who is this resource for?

This reviewer is aimed at helping civil society to better understand the changes made to UK environmental law as a result of the UK leaving the EU, to identify and monitor potential concerns and to advocate for changes to legislation where problems are identified.

Contributing to this resource

This document was created by Friends of the Earth, ClientEarth and Green Alliance, with contributions from WWF-UK, RSPB, Wildlife and Countryside Link, CHEMTrust, PAN-UK, and others.

If you would like to contribute further analysis or links please email Aradhna Tandon at atandon@green-alliance.org.uk
